in niloufarsoltani    22/04/1993    Toronto, ON

## SUMMARY

I am a driven and passionate junior front-end developer with a strong foundation in various technologies and frameworks. With a background in QA, I possess a keen eye for detail and a passion for delivering high-quality software. I pursued my dream of becoming a front-end developer through rigorous self-study, personal projects, and professional work. My goal is to create engaging and user-friendly web applications that provide value to both clients and end-users. I am dedicated to delivering high-quality work and continuing to grow my skills and knowledge in this dynamic field.

## SKILLS

### project management tools:

Github, Gitlab, Jira, Scrum, Agile

### Tools and Technologies

BPMN Tool

### Web Development

HTML, CSS, React, JavaScript, CSS modules, Sass,  
React hooks, Bootstrap, Redux, Responsive web  
design, REST API

## PROFESSIONAL EXPERIENCE

### Quality Assurance Specialist

*Fanap ICT Co*

09/2019 – 12/2020

Tehran, Iran

At Fanap, I was a *QA specialist* in charge of testing one product, but after I proved my dependability, I was given concurrent testing responsibilities for three additional projects.

- For the first time in the company, I write comprehensive test scenarios and test cases to ensure product quality.
- Conduct unit tests and integration tests to identify bugs and errors.
- Act as a liaison between the development team, project managers, and business analysts.
- Collaborate with developers to troubleshoot and resolve issues.
- Communicate testing progress and results to stakeholders.
- Analyze test results and provide feedback to the development team for continuous improvement.
- Work with BPMN tool

### Front-end developer

*Rasha Communications Development*

01/2018 – 08/2019

Tehran, Iran

- As a junior front-end developer at Rasha, I worked alongside senior developers to design and implement user interfaces using HTML, and CSS.
- I contributed to the development of several projects, gaining hands-on experience with agile methodologies and version control tools like Git.
- I also collaborated with other team members to troubleshoot issues and improve website performance.
- Additionally, I assisted with the transition from CSS modules to Styled Components, which improved the project's maintainability and scalability.
- In addition to development tasks, I also assisted in quality assurance testing, ensuring that each feature met the requirements outlined in the project specification. Through this role, I gained a better understanding of the importance of testing and debugging in the software development process.

## PROJECTS

---

### English Learning App

This language learning app, built with *React*, *React Router*, *Redux*, *Firebase authentication*, and *real-time data base*, provides a comprehensive language learning experience. Its features include searching word definitions, enhancing listening skills through engaging stories, and keeping track of vocabulary with flashcards. It caters to both language learners and educators, making it an ideal language-learning tool.

### Basic Food Order App

Indulge in the convenience of a *React-powered* mock food ordering app, complete with *custom hooks* and *React Context* for a streamlined ordering process simulation.

## EDUCATION

---

### Bachelor of Architecture

University of Bonab

09/2011 – 05/2015

Bonab, Iran

- **GPA:** 16.54 / 20
- **Relevant coursework:** Design Thinking, Digital Fabrication, Sustainability in Architecture
- Developed strong skills in critical thinking, problem-solving, and creative design through coursework and studio projects

## LANGUAGES
